

# LiFe Premium Series Lithium Battery

The Powerplus Energy PowerLink module retrieves the battery performance data from LiFe and ECO PS Series batteries which have the Australian made Digital Battery Management System (BMS).

The new digital BMS is currently available in the LiFe12033P and will be officially released as an option in the PS Series across the range in late Q4 2020.

## Greater Visibility

The information provided by the PowerLink module is accessible on most computers, tablets and phones via web browser. Voltage, current and battery temperature data is currently available with Power and SOC and other values to be added as we expand the features.

The Powerplus Energy batteries have been designed as a stand alone self managed solution, however the PowerLink module also provides information via MODBUS with future releases including CANBUS and SNMP options.

Tech Data	
Battery Connection	RS485 - Battery comms signal bus x 2 RJ45
Communications	Ethernet/ Modbus TCP-IP
I/O	USB-A x 4 - Future Use/ Diagnostics
Power	5v
Power Connection	USB-Micro
Dimensions	110mm W x 110mm D x 40mm H
Weight	450G
