## PowerPlus Energy and Redx enter Technology Partnership to Deliver High-Quality Energy Storage Solutions

The PowerPlus Energy Whispr-7 was soft launched at the [Smart Energy Conference](#) earlier this month, generating strong interest from installers and industry insiders alike. We are now ready to officially reveal the story behind it.

The CEC listed Whispr-7 is the first residential product from a new technology partnership between PowerPlus Energy and [Redx](#), a leader in bringing power electronic innovation to the market. This partnership will deliver product that provide reliable power access for all homeowners

*“Whispr-7 is a natural progression for us,” said Ben Spincer, Executive Chairman at PowerPlus Energy. “It brings together our off-grid heritage, our customer-first mindset, and Redx’s impressive technology—to deliver an intelligent, Australian engineered, and CEC -listed solution for grid-connected homes.”*

*“This partnership will allow us to scale rapidly, deliver more solutions to customers, and stay focused on what we do best—sales, service, and support,” said Spincer. “We’re making it easier than ever for Australian families and businesses to take control of their energy—whether they’re off-grid or on and at an affordable price.”*

Designed, engineered, and supported in Australia, the Whispr-7 reflects PowerPlus Energy’s deep understanding of the local energy landscape. From the inside out, it’s made to suit Australian conditions, homes, and installers—offering flexibility and peace of mind.

Jonathan Chen, Founder and CEO of Redx, said the collaboration is grounded in shared values and a strong local vision.

*“We respect PowerPlus Energy’s focus on quality and service,” said Jonathan. “This partnership brings together two companies with a shared goal: to deliver reliable, accessible energy solutions to Australians—through innovation backed by local support.”*

As PowerPlus Energy continues to grow its offering, Whispr-7 signals a new chapter—one that keeps Australian homeowners at the centre, meets the evolving needs of the residential energy storage market, and reinforces the company’s long-standing mission to power possibilities for everyone.
